

BCA 3rd SEMESTER EXAM. 2014
INTERNET AND WEB DESIGNING CODE- 303302

Time: 3 hours

Full Marks: 60

Instructions:

- i. The Marks are indicated in the right -hand margin.
- ii. There are **SEVEN** questions in this paper.
- iii. Attempts **FIVE** question in all.
- iv. Question Nos. **1** and **2** are compulsory.

1. Choose the correct option to the blanks (any six).

6*2=12

(a) _____ is known as father of www.

(I) John T. Thomson

(II) Dennis Ritchie

(III) Tim Berners-Lee

(IV) none of them

(b) _____ is the primary protocol used to distributed information on the web.

(I) TCP/IP

(II) FTP

(III) HTTP

(IV) Telnet

(c) Category of website is _____.

(I) Corporate-type Website

(II) Individual Website

(III) Both (I) and (II)

(IV) None of the above

(d) _____ tag allows you to display images on your web page.

(I) <image>

(II)

(III) <SRC>

(IV) None of the above

(e) _____ to provide a call back interface.

(I) DOM

(II) SAX

(III) Both (I) and (II)

(IV) None of the above

(f) _____ is the top-eve object in the JavaScript hierarchy.

(I) The window object

(II) The document object

(III) The button object

(IV) None of the above

(g) _____ joins two or more arrays and returns the result.

(I) join ()

(II) add ()

(III) con cat()

(IV) None of the above

(h) _____ moves a window to the specified position.

(I) Move by ()

(II) Move to ()

(III) Move form ()

(IV) none of the above

(i) _____ object is an object wrapper for a Boolean value.

(I) The JavaScript Boolean

(II) The Bool

(III) Both (I) and (II)

(IV) None of the above

(j) _____ removes focus the current window.

(I) Blur ()

(II) Alert ()

(III) Focus ()

(IV) None of the above

2. Answer any three of the following:

3*4=12

(a) Write a JavaScript program to find whether the number is prime or not?

(b) What do you mean by HTML converter?

(c) What do you mean by window object?

(d) What is XML schema? Explain.

(e) Write a program to create frames using percentage?

Answer any three of the following:

3*12=36

3. Write a JavaScript program for calculator.

4. Write a JavaScript program to display random images.

5. Write a program in JavaScript to sort the array.

6. Explain the JSP actions in detail.

7. Explain Page-Directive in JSP in detail.

Code : 303302

BCA 3rd Semester Theory Examination, 2017

Internet & Web Designing

3 Hrs

Full Marks : 60

Instructions :

- i) The questions are of equal value.
- ii) There are **Seven** questions in this Paper.
- iii) Attempt **Five** questions in all.
- iv) **Question Nos. 1 & 2** is compulsory.

Choose the correct answer (any six) of the following:

2×6=12

- i) Which tag is used to display that picture?
 - (i) picture
 - (ii) image
 - (iii) img
 - (iv) src
- ii) tag makes the enclosed text bold. What is other tag to make text bold?
 - (i)
 - (ii) <dar>
 - (iii) <black>
 - (iv) <emp>

P.T.O.

- (c) Tags and text that are not directly displayed on the page are written in section.

- (i) <html>
- (ii) <head>
- (iii) <title>
- (iv) <body>

- (d) Which tag inserts a line horizontally on your web page?

- (i) <hr>
- (ii) <line>
- (iii) <line direction = "horizontal">
- (iv) <tr>

- (e) What should be the first tag in any HTML document?

- (i) <head>
- (ii) <title>
- (iii) <html>
- (iv) <document>

- (f) Which tag allows you to add a row in a table?

- (i) <td> and </td>
- (ii) <cr> and </cr>
- (iii) <th> and </th>
- (iv) <tr> and </tr>

- (g) How can you make a bulleted list?

- (i) <list>

Code : 303302

(ii) <nl>

(iii)

(iv)

(h) How can you make a numbered list?

(i) <dl>

(ii)

(iii) <list>

(iv)

(i) Which of the following is an attribute related to font tag?

(i) size https://www.akubihar.com

(ii) race

(iii) color

(iv) All of above are style tags

(j) IPv6 addressed have a size of

(i) 32 bits

(ii) 64 bits

(iii) 128 bits

(iv) 265 bits

Answer any three of the following: 4×3=12

(a) Enumerate the differences between Java and JavaScript.

(b) How to insert JavaScript in HTML?

(c) What are the standard actions available in JSP?

(d) What is an Expression in JSP?

e : 303302

3

P.T.O.

(e) How do you create links to sections within the page?

Answer any three questions of the following:

3. What is Transmission Control Protocol? Explain its

4. What are the steps of establishing connection to the

5. Explain advantages and disadvantages of JavaScript

6. What is JSP? Explain its advantages.

7. What is JavaScript function? Explain with an example.

INTERNET AND WEB DESIGNING

Time : 3 hours

Full Marks : 60

Instructions :

- (i) The marks are indicated in the right-hand margin.
- (ii) There are **SEVEN** questions in this paper.
- (iii) Attempt **FIVE** questions in all.
- (iv) Question Nos. 1 and 2 are compulsory.

1. Choose the correct answer of the following
(any six) : 2×6=12

(a) The main function of a browser is to

- (i) compile HTML
- (ii) interpret HTML
- (iii) decompile HTML
- (iv) interpret CGI programs

(b) In `<IMG SRC="C:PICTURE/BB1.gif" ALIGN="middle">`, ALIGN

is

- (i) a tag
- (ii) the head
- (iii) the body
- (iv) an attribute

AK9/292

(Turn Over)

(2)

(c) Domain names are converted to

- (i) a binary string
- (ii) an alphanumeric string
- (iii) IP addresses
- (iv) a hexadecimal string

(d) On Internet, which of the following versions of the Internet Protocol is the most widely used?

- (i) IPv1
- (ii) IPv6
- (iii) IPv2
- (iv) IPv4

(e) Desirable properties of a Web site are which of the following?

1. A meaningful address
2. Help and search facilities
3. Links to related sites
4. Features to allow users to give feedback
5. Hosting on a mainframe

Select the answer using the codes given below :

- (i) 1, 2, 3
- (ii) 1, 2, 3, 4
- (iii) 1, 2, 3, 5
- (iv) All of the above

AK9/292

(Continue)

(f) Which is the default scripting language in HTML?

- (i) JavaScript
- (ii) Perl
- (iii) EcmaScript
- (iv) VBScript

(g) The HTML tags that create a table header are

- (i) <head></head>
- (ii) <ttop></ttop>
- (iii) <th></th>
- (iv) <td></td>

(h) Which of the following is a server side technology? <https://www.akubihar.com>

- (i) HTML
- (ii) JSP
- (iii) JavaScript
- (iv) CSS

(i) Which protocol is used by Web browser for communication with Web server?

- (i) HTTP
- (ii) FTP
- (iii) SMTP
- (iv) UDP

(Turn Over)

(j) TCP is a commonly used protocol at

- (i) application layer
- (ii) network layer
- (iii) transport layer
- (iv) physical layer

2. Answer any *three* of the following questions:

4x;

- (a) What are the advantages of JavaScript?
- (b) Explain page directive and include directive in JSP with example.
- (c) What is the difference between XML and HTML?
- (d) Write a JavaScript program to display Fibonacci series.
- (e) Explain any four text formatting tags in HTML.

3. Explain in detail the layers of TCP/IP protocol.

4. (a) Explain the structure of XML document with example.

(b) Explain all tags and attributes used for managing tables in HTML with example.

9

5. What is HTML form? Explain the elements of HTML form with example. 12
6. Explain any four JSP actions with syntax. 12
7. Write HTML and JSP codes for sending registration details (first name, last name, username, password) from HTML page and displaying them on a JSP page. 12

(b) Internet uses

- (i) packet switching
- (ii) circuit switching
- (iii) telephone switching
- (iv) telex switching

(c) Web pages are uniquely defined using

- (i) IP addresses
- (ii) URL
- (iii) domain
- (iv) file name

(d) Dynamic Web page

- (i) is same every time whenever it displays
- (ii) generates on demand by a program or a request from browser
- (iii) Both (i) and (ii)
- (iv) None of the above

(e) What is a Web browser?

- (i) A program that can display a Web page
- (ii) A program used to view html documents
- (iii) It enables user to access the resources of internet
- (iv) All of the above

20AK/414

(Continue)

(f) Which of the following is not a valid attribute of a page directive?

- (i) Language
- (ii) Extend
- (iii) Export
- (iv) Import

(g) WWW is based on which model?

- (i) Local-server
- (ii) Client-server
- (iii) 3-tier
- (iv) None of the above

(h) JavaScript Code can be called by using

- (i) RMI
- (ii) Triggering Event
- (iii) Preprocessor
- (iv) Function/Method

(i) The escape sequence '\f' stands for

- (i) floating numbers
- (ii) representation of functions that returns a value
- (iii) \f is not present in JavaScript
- (iv) form feed

(j) IPv6 addresses have a size of

- (i) 32 bits
- (ii) 64 bits
- (iii) 128 bits
- (iv) 265 bits

2. Answer any *three* of the following : $4 \times 3 = 12$

- (a) What are the characteristics of Transmission Control Protocol?
- (b) Explain how to declare and access elements of array in JavaScript with syntax.
- (c) Explain how tables are used in HTML document.
- (d) Write JavaScript program to check Odd/Even Number.
- (e) What are the JSP scripting elements?

3. Explain any two standard library functions available in JavaScript. Write JavaScript functions to Validate Name, MobileNo and Age fields in HTML form. The name field should not be empty, MobileNo should be of 10 digits and Age should be a number and not character.

(5)

4. What is the difference between SGML and XML? Write XML syntax for storing 'Book' details in bookstore of any five books. 12
5. Explain all tags used in HTML for text formatting and lists. 12
6. Explain TCP/IP services in detail. 12
7. Write the code using HTML and JSP to calculate addition, multiplication and division of two numbers with example. 12

- (i) The marks are indicated in the right-hand margin.
- (ii) There are **SEVEN** questions in this paper.
- (iii) Attempt **FIVE** questions in all.
- (iv) Question Nos. **1** and **2** are compulsory.

1. Choose the correct answer (any six) : $2 \times 6 = 12$

(a) What is Internet?

- (i) A single network
- (ii) A vast collection of different networks
- (iii) Interconnection of local area networks
- (iv) None of the above

(2)

(b) To join the Internet, the computer has to be connected to an

- (i) Internet architecture board
- (ii) Internet society
- (iii) Internet service provider
- (iv) None of the above

(c) Which of the following is an attribute of <Table> tag?

- (i) SRC
- (ii) LINK
- (iii) CELLPADDING
- (iv) BOLD

(d) Which statement is true?

- (i) An XML document can have one root element
- (ii) An XML document can have one child element
- (iii) XML elements have to be in lowercase
- (iv) All of the above

(e) Which of the following is capability of functions in JavaScript?

- (i) Return a value
- (ii) Accept parameters and return a value
- (iii) Accept parameters
- (iv) None of the above

(f) What is the correct JavaScript syntax to write "Hello World"?

- (i) System.out.println("Hello World")
- (ii) println("Hello World")
- (iii) document.write("Hello World")
- (iv) response.write("Hello World")

(g) Scripting language is

- (i) high-level programming language
- (ii) assembly-level programming language
- (iii) machine-level programming language
- (iv) None of the above

(h) What is meant by "this" keyword in JavaScript?

- (i) It refers current object
- (ii) It referees previous object
- (iii) It is variable which contains value
- (iv) None of the above

(i) Inside which HTML element do we put the JavaScript?

- (i) <js>
- (ii) <scripting>
- (iii) <script>
- (iv) <javascript>

(j) Which of the following cannot be done with client-side JavaScript?

- (i) Validating a form
- (ii) Sending a form's contents by email
- (iii) Storing the form's contents to a database file on the server
- (iv) None of the above

2. Answer any *three* of the following : $4 \times 3 = 12$

- (a) How are frames created? What is a frameset?
- (b) How can I include comments in HTML? What are the standard actions available in JSP?
- (c) What are the JSP scripting elements?
- (d) What are the life-cycle methods of JSP?
- (e) What is a private IP address?

(5)

3. ✓ What is TCP/IP? Explain its services. 12
4. ✓ What is HTML? Explain the structure of an HTML document. 12
5. ✓ What is JavaScript? Explain its advantages and disadvantages. 12
6. What are JavaScript operators? Explain JavaScript expression. 12
7. What is JSP? Explain its advantages. 12

- (iii) Attempt **FIVE** questions in all.
- (iv) Question Nos. **1** and **2** are compulsory.

1. Choose the correct answer (any six) : $2 \times 6 = 12$

(a) Which one makes a bullet-point list in HTML?

- (i) `<ol>` (numbered list)
- (ii) `<ul>` (bulleted list)
- (iii) `<li>` (list item)
- (iv) `<dl>` (description list)

(b) Which CSS thing changes the space between lines of text?

- (i) Text-spacing
- (ii) Line-height
- (iii) Letter-spacing (space between letters)
- (iv) Word-spacing (space between words)

(Turn Over)

- (c) What does URL mean?
- (i) Universal Resource Locator
 - (ii) Uniform Resource Locator
 - (iii) Unified Resource Link
 - (iv) User Related Location
- (d) Which language runs in the web browser?
- (i) PHP (server-side)
 - (ii) Python (server-side)
 - (iii) JavaScript
 - (iv) SQL (database)
- (e) Which HTML tag puts a picture on a web page?
- (i) <picture>
 - (ii) <graphic>
 - (iii)
 - (iv) <media>
- (f) Which of the following is a key advantage of using JavaScript in web development?
- (i) Server-side database management
 - (ii) Client-side interactivity and responsiveness
 - (iii) Operating system level programming
 - (iv) Hardware driver development
- (g) One of the significant advantages of JavaScript is its ability to
- (i) directly access and manipulate hardware components

- (ii) reduce server load by handling tasks on the client-side
- (iii) compile code into machine language for optimal performance
- (iv) manage complex relational databases

2. Answer any *three* of the following questions :

4×3=12

- (a) Explain the difference between front-end and back-end web development in your own words.
- (b) Describe the roles of HTML, CSS and JavaScript in creating a web page.
- (c) What are the key considerations for designing a website that is accessible to users with disabilities?
- (d) Discuss the importance of responsive web design in today's digital landscape.
- (e) Briefly explain the concept of a URL and its components.

3. Explain the fundamental role of a web browser in accessing and interacting with the Internet. Describe the steps involved in retrieving and displaying a web page, and discuss how different browsers might affect the user's experience.

12

4. Describe the essential function of HTML in structuring a web page. Explain how HTML tags are used to define elements and organize content. Discuss the evolution of HTML and its relationship to other web technologies. 12
5. Discuss the role of JavaScript in adding interactivity and dynamic behavior to a web page. Explain how JavaScript interacts with HTML and CSS. Describe some common JavaScript functionalities, such as event handling and DOM manipulation. Consider the impact of JavaScript frameworks and libraries on web development. 12
6. Differentiate between a website and a web page, and explain how they relate to each other. Discuss the structure and organization of a typical website. Consider the importance of site navigation and information architecture in web design.
7. Discuss the following : 12
 - (a) JSP scripting
 - (b) SGML
 - (c) Domain registration
 - (d) TCP/IP
 - (e) Dynamic web pages
 - (f) Client IP address
